Education

Michigan Technological University, Houghton MI
B.S. Computer Science, anticipated Spring 2023
Current GPA: 3.27

Project Experience

Husky Review Web Application   Jan 2022 - April 2022
- Group project creating a web application using Vue, MongoDB, Express.JS, Node, HTML, CSS, and Axios.
- Created the majority of Front End as well as did all the initial setup for the project
- Did all UI design and layout for the project
- Idea was to create something similar to Rate My Professors but only for professors at Michigan Tech to allow students to better choose classes.
- Each review had the name of the professor, the class, a rating, and a spot for the user to add any additional comments to the review. All reviews were dynamically loaded
- Users could look through, sort, and search reviews

Little Brothers Driver Web Application   Jan 2022 - April 2022
- Worked with a team as part of HIDE enterprise to develop a web app using HTML, CSS, Vue, Laravel, Axios, and Microsoft SQL for the Little Brothers Foundation to schedule appointments for drivers to pick up clients
- Used Axios to format and send data from forms to Microsoft SQL database
- Worked with team members to implement an appointments page, which allows the Admin user to create and edit appointments for drivers. Also collaborated with team members and the client to make various design changes.

Portfolio Website   Jan 2022 - Current
- Solo personal project creating a website to act as a portfolio
- Website was created using React, HTML, CSS, and React Bootstrap

Technical Skills

Vue	Javascript	Git
React	Java	Photoshop
Bootstrap	C	Blender
HTML	MySQL	Microsoft Office
CSS
